

Naturally blast Your Testosterone and Growth Hormone Levels into the Stratosphere, Without Side Effects. Increase Your Muscle Building and Fat-Burning Ability...Naturally, Safely and LEGALLY!

Humanogrowth®

Growth Factor Formula

New Humanogrowth® is a Scientific Breakthrough composed of key powerful muscle building agents that when combined unlock your ability to make huge gains in muscle mass and strength by dramatically increasing your body's own production of testosterone and growth hormone, NATURALLY, SAFELY, and LEGALLY. Humanogrowth is not a steroid or prohormone!

Ingredient #1: Humanofort®

Humanofort® is a patented, pharmaceutically standardized embryo extract from Europe that has been clinically shown to boost testosterone and growth hormone levels while reducing cortisol levels!

Humanofort® is also rich in various growth factors that are beneficial not only for your hormonal production but also for your general health!

Humanofort® Growth Factors:

- **IGF-1 – Insulin like Growth Factor 1** (IGF-1) is a peptide (protein) with key roles in growth and development. It is responsible for many of the growth promoting effects of growth hormone (GH).
- **FGF – Fibroblast Growth Factors** (FGF) are compounds important in the formation of connective tissue (i.e. tendons and ligaments).
- **NGF – Nerve Growth Factors** are peptide compounds that support nerve cell function.
- **EGF – Epidermal Growth Factors** are polypeptides that support the formation and maintenance of the epidermis (outer layer of skin) as well as wound healing.
- **CTGF – Connective Tissue Growth Factors** are peptides that, like FGF, promote the formation of various connective tissue including skin, tendons, and ligaments.

All of these growth factors aid to:

- Raise testosterone
- Reduce cortisol
- Reduce oxidative stress, and thus, speed recovery
- Increase sexual drive
- Improve sleep

Ingredient #2: Lean Muscle Accelerator® (LMA)

Lean Muscle Accelerator® is a purified plasma protein that improves protein efficiency by up to 31% and promotes a positive nitrogen balance by up to 20%! Increased protein efficiency and a higher nitrogen balance means that you convert more of the protein you eat to muscle!

In addition, not only does it help to stimulate growth, regenerate and accelerate muscle tissue, but it also tells your body to “burn” fat for fuel instead of muscle tissue during dieting!

As a bonus, LMA® also:

- Contains Insulin Growth Factor 1 (IGF-1)
- Contains Transforming Growth Factor Beta (TGFB) which is an anti-inflammatory, helps recovery, and is beneficial in repairing rips in the muscles.
- Has been found to reduce inflammation by up to 6.5%
- Has been found to improve cholesterol by up to 14%
- Boosts immunity!

Realize Your Untapped Muscle Building and Fat Loss Potential with Labrada Nutrition's Humanogrowth®!
